

Quantum Contextual Semantic Embeddings (QCSE): Empirical Research Synthesis

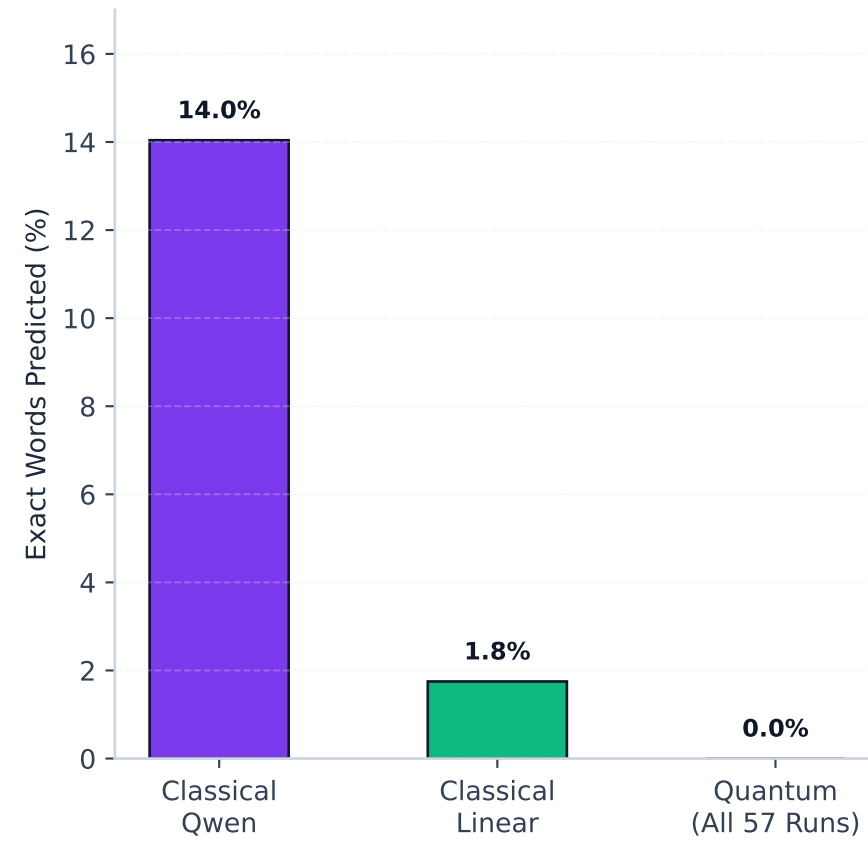

1. Flawed Metric Exposed:
Prior Gets 96.5% Without Context

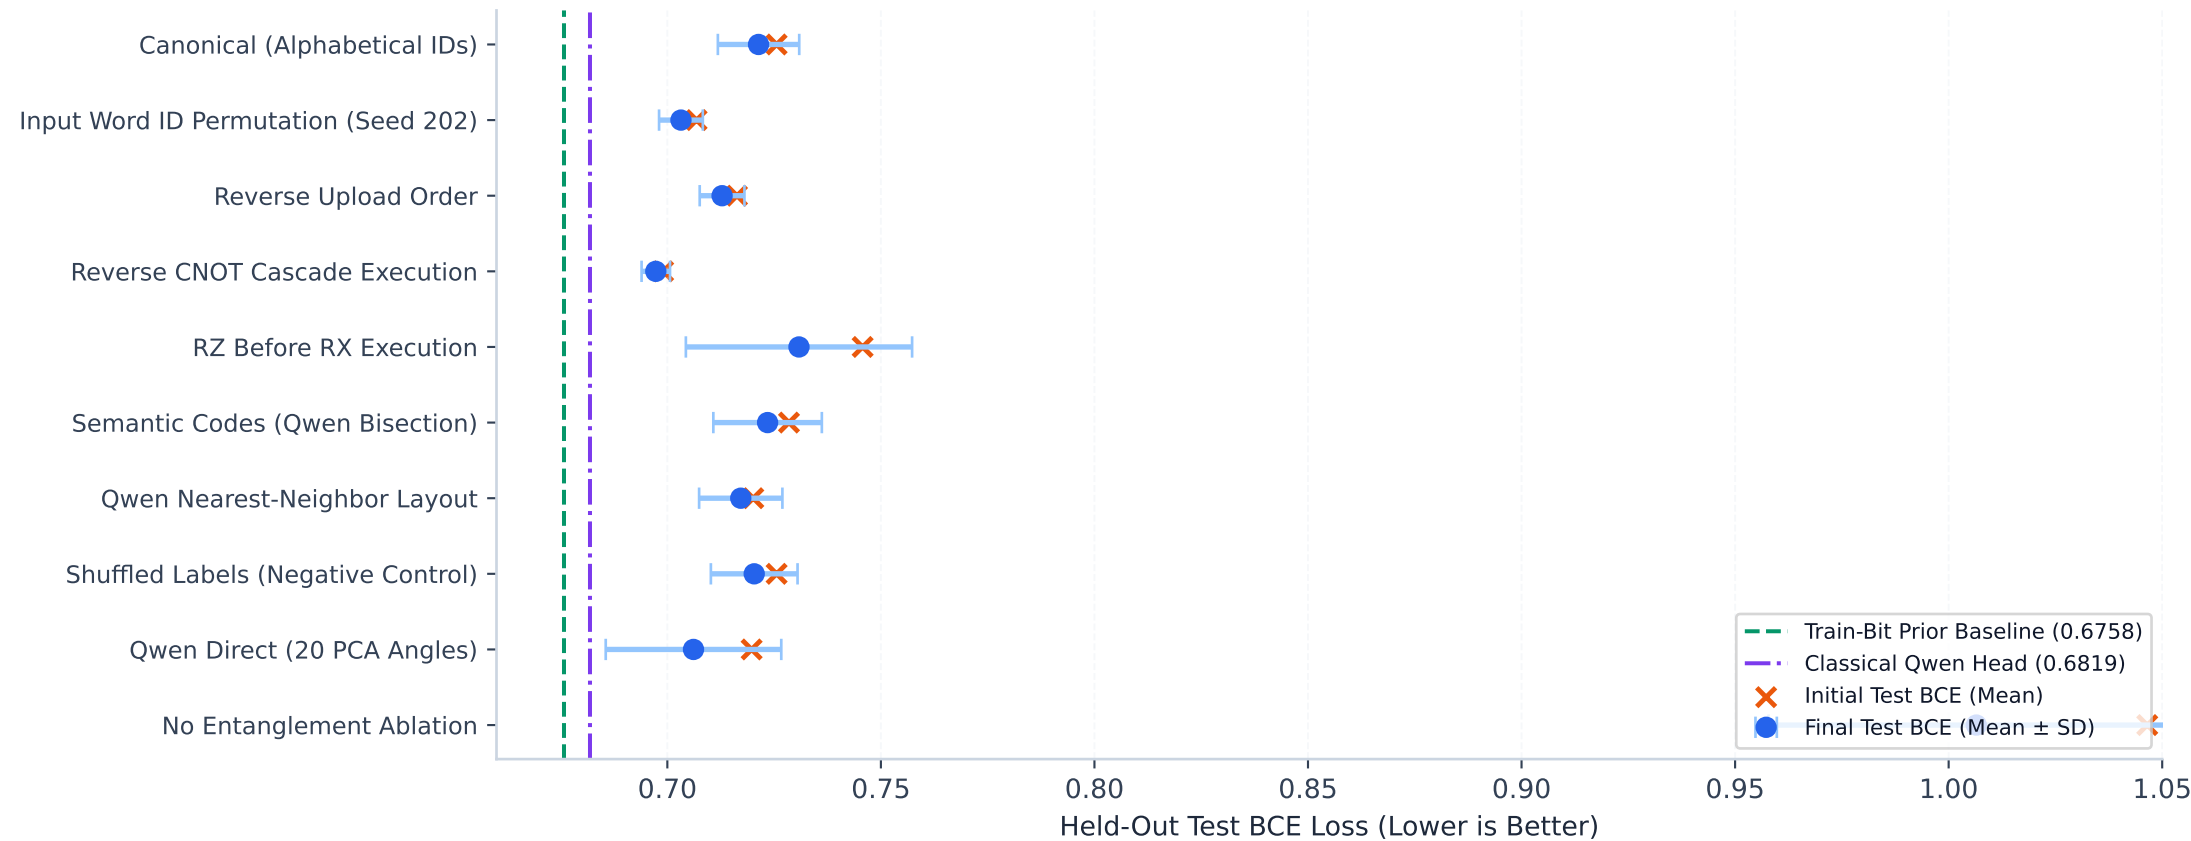

2. Negative Control: Shuffled Labels
Tied With Real Training (0.720 vs 0.721)

3. Word Recovery Accuracy:
Classical 14% vs. Quantum 0.0%

4. Selected Pilot Variants: Test BCE and Initialization Bias

5. State Fidelity Invariant:
Basis States Remain Orthogonal
